

Did you know all your good recycling work could be going to waste when you put recyclables in plastic bags in your recycling container?

It's time to 'think outside the plastic bag' and empty recyclable materials directly into your recycling container to ensure they have a second life. Tons of materials are sorted at recycling facilities – plastic bags cannot be opened and sorted, they wrap around the equipment, and pose safety hazards to workers. If you collect recyclables in plastic bags at home in the kitchen, office, or bathrooms, remember to empty those bags directly into your recycling container before taking it to the curb. So, the next time you recycle, think outside the plastic bag and recycle right! Visit Recycle Often. Recycle Right.com to learn more.
